Regardless of the disability, everyone enjoys being part of a community.

Individuals who are immobile and need to lie down for much of the day, often feel cut off from social interaction. One reason is that a bed or other stationary location is the necessary place for lying in supine positions. No matter how well-intentioned this positioning may be, the user is often isolated from the community.

The Sitt'er Sleep'er makes it possible for users to be comfortable, mobile and supported. Sitt'er Sleep'ers can be used for rest, relaxation, stabilization, support and also for transport indoors. It provides many options for positioning and height adjustment. These features and effortless adjustability enable the user to participate in more activities, whether lying or sitting.

Who can use the Sitt'er Sleep'er?

- Children and adults with severe physical disabilities
- Persons with deformities or asymmetries
- Persons with poor muscle tone
- People who need frequent changes of position and who have difficulty sitting for long periods

Benefits of the Sitt'er Sleep'er:

- Range of settings from lying to sitting
- Accessory cushions allow for unique positioning
- Facilitates pressure redistribution through power positioning features.
- The user is mobile, even though they need to be supine
- The Sitt'er Sleep'er fits through standard doorways and has a growth adjustable frame, which reduces strain on caregivers.

Practical Information:

- Power features include recline, lower extremity elevation and a high/low adjustment.
- Intended to be used for rest, relaxation and stability.
- 29" width allows for moving within most homes and facilities.
- Easy to adjust and operate
- Height/angle adjustable push handlebar
- Wheels with puncture-proof tires, brakes and handlebar
