OUTDOORS

### Supportive Headrest:

The height-adjustable improved headrest provides increased occipital and lateral head support, while keeping the neck in line with the spine and opening up airways.

### Multi- Use Modular Support Wedge:

The multi-use wedge can be moved to various regions of the chair to customize postural support where the user needs it most.

### Removable Abduction Pommel

The Removable Abduction Pommel sits between the user's legs to help encourage hip abduction.

### 3-Point Padded Pelvic Positioning Belt

Ideal for when the user needs extra pelvic stabilization. Three discreet straps blend into the chair's cover providing optimum support and the same comfort our chairs are known for.

Unique colors, patterns and textures make up our latest fabrics. Colors and textures were carefully chosen based on occupant response. Choose between smooth plush finishes with soothing characteristics or highly textured fabrics for increased tactile and visual stimulation.

Endurepel™ Armour topcoat protection provides an easy clean finish that has anti-bacterial and anti-mildew properties. Darker vinyl colors are equipped with Encool technology keeping the fabric 10% cooler when exposed to direct sunlight.

SolarShade fabrics are created with high UV rating, water repellency and anti-microbial technology. Built perfectly for indoor and outdoor use. Like all other Chill-Out Chair fabrics, Solarshade fabrics are extremely durable.

Seaside and Prairie fabrics were selected based on feel, comfort, and style. Cozy and cool these fabrics are treated with Endurepel™ Shield offering anti-stain, anti-microbial, and moisture repellent technology, combined with easy clean and odor protection properties.
